### 注意!

- ★ 不要让软管摩擦缠绕，过分拉伸，扭曲弯折，否则会使软管破损，影响工作压力。
- ★ 环境或流体温度高于60度时，请谨慎使用，温度太高管子爆破压力会降低，存在破裂的危险。

### Attention!

- ★ Do not make the hose friction, winding, excessive stretching, twist bending, otherwise it will damage the hose, affecting the working pressure.
- ★ When the environment or fluid temperature is higher than 60°C, please use with caution, the temperature is too high, the burst pressure of the pipe will be reduced, there is the risk of rupture.
